SUMMARY

Final-year Computer Science Engineering student with internship experience across cloud data engineering and business analytics. Takes problems from raw, fragmented data through to a structured recommendation, and turns analysis into reports and dashboards that non-technical stakeholders act on. Seeking an Analyst role in infrastructure and public sector advisory.

SKILLS

Analysis & Advisory: Data analysis, scenario and sensitivity analysis, forecasting, requirements gathering, stakeholder reporting, report and presentation writing
Data & Reporting: SQL, Python, Power BI, Tableau, Advanced Excel, Google Analytics
Cloud & Engineering: AWS (S3, Lambda, Kinesis, Glue), Azure, ETL and data pipeline design
Business: Business case support, cost and pricing analysis, accounting and finance fundamentals

EXPERIENCE

Accenture, Data Engineering Intern **Mumbai, *Jan'26 - July'26***

- Built a serverless data pipeline on AWS, ingesting files into an S3 landing bucket, streaming records through Kinesis, and transforming them with event-triggered Python Lambda functions before writing curated output to a separate S3 bucket for reporting
- Wrote SQL to reconcile source and curated layers and configured Glue crawlers to keep schemas current as source formats changed, catching schema drift and duplicates before they reached reports
- Documented pipeline architecture, failure handling, and reprocessing steps, and led handover walkthroughs with the client team

Zeproc, Technical Marketing Intern **Gurgaon, *June'25 - Aug'25***

- Audited 50+ product pages to identify indexing and crawlability gaps, translating findings into a prioritized remediation roadmap for product and content teams
- Implemented structured schema markup and keyword architecture against that roadmap, driving a 30% increase in click-through rate

ATI Travel Pvt. Ltd, IT Analyst Intern **Gurgaon, *Dec'24 - Jan'25***

- Analyzed booking and customer data in SQL to identify demand and market trends, supporting a 15% increase in product visibility
- Streamlined data extraction and reporting processes, improving analytics turnaround and reliability by 20%

Traverse India Pvt. Ltd - Data & IT Intern **Mumbai , *May'24 - July'24***

- Analyzed operational data to uncover trends and inform business recommendations, contributing to a 40% increase in operational efficiency
- Built interactive Power BI dashboards giving management a single view for decision-making

PROJECTS

- Sales Performance & Demand Forecasting Dashboard: Built an end-to-end SQL and Python pipeline with Power BI dashboards supporting demand scenarios and planning decisions
- Serverless Data Pipelining on AWS: Designed a scalable data architecture and migration strategy for legacy ETL workflows
- Inventory Management System: Developed a SQL-based tracking system with advanced querying for reporting

EDUCATION

Manipal University, Rajasthan, India *Sept'22 - May'26*
Bachelor of Technology in Computer Science Engineering

- Coursework: Data Structures & Algorithms, OOP (Java), AI & Soft Computing, Data Science and Machine Learning
- Finished 2nd in SIH Hackathon 2024 and 3rd in MUJ Hackathon 2023; published research on Heart Disease Detection and Blockchain-based Law Enforcement
- Head of Technical Services, AIEEE Club and Head of Logistics, LITMUS: led planning, vendor outreach, and execution for a 1,000+ participant college event

Lotus Valley International School, Gurgaon - PCM with Computer Science *Aug'12 - June'22*

CERTIFICATIONS

Wharton Business Foundations, AWS Cloud Practitioner Essentials, AWS AI Practitioner, SQL Basics (Udacity), DAA (NPTEL)
